SUMMARY

Backend Developer with two years of experience designing and delivering scalable, production-grade systems with PHP and Laravel. Proven track record in payment and subscription integrations, real-time applications, and enterprise operations platforms. Committed to clean architecture, automated testing, and reliable delivery through CI/CD.

PROFESSIONAL EXPERIENCE

Gourmet Egypt

05/2025 – Present

Backend Developer

Zamalek, Egypt

- Develop and maintain the company's inventory and operations platform, used daily by store, warehouse, and delivery teams.
- Built the centralized product and pricing service that serves as the single source of truth across point-of-sale, e-commerce, and loyalty channels.
- Delivered procurement, inventory transfer, and order-preparation workflows, replacing manual processes with automated, auditable flows.
- Improved reliability and performance by moving reporting, notifications, and third-party synchronization to background processing.

Lothgha

02/2025 – Present

Backend Developer (Remote, Part-time)

Jeddah, Saudi Arabia

- Develop and maintain the backend of a production subscription mobile app serving users across the Middle East and Europe, including REST APIs and the admin panel.
- Built multi-currency payments and subscriptions across Stripe and Apple/Google in-app purchases, with secure server-side verification and financial reconciliation.
- Delivered real-time chat, live session scheduling, and push notifications, and migrated 40,000+ user recordings and legacy data to the new platform.
- Established the automated test suite, CI/CD pipeline, and branching workflow, enabling safe staged releases for a growing team.

ITSP Group

10/2024 – 02/2025

Backend Developer

Giza, Egypt

- Built and documented REST API endpoints backed by normalized relational schemas.
- Structured shared business logic into service layers to keep features isolated and easy to extend.
- Refactored legacy code toward a clean layered architecture and wrote integration tests covering API contracts ahead of each staging release.

PROJECTS

FreshCart — Multi-Vendor E-Commerce API

[github](#)

- Multi-vendor marketplace REST API with customer, vendor, and admin roles, token-based authentication via Laravel Sanctum, and access control through Policies.
- Swappable payment gateways using the Strategy pattern, and a Laravel Pipeline for staged checkout pricing (discount calculation, coupon redemption).
- Order placement and coupon redemption wrapped in database transactions; refunds and notifications offloaded to queued jobs. Typo-tolerant product search with Laravel Scout and Meilisearch; checkout, coupon, and payment flows covered by a PHPUnit suite.

Filament Construction Management System

[github](#)

- Internal admin panel in Filament v4 managing clients, subcontractors, logistics suppliers, expenses, and billing, with role-based access control via Spatie Permission.
- On-demand Excel and PDF exports for financial and operational reports across four system modules.

TECHNICAL SKILLS

Languages & Frameworks: PHP 8.x, Laravel 10/11/12, Filament v3/v4, Livewire

APIs & Real-Time: REST API Design, Laravel Sanctum, JWT, Laravel Reverb, WebSockets, Firebase Cloud Messaging

Databases, Search & Queues: MySQL (Schema Design, Indexing, Query Optimization, Transactions), Redis, Laravel Queues, Laravel Scout, Meilisearch

Testing & Quality: Pest, PHPUnit, Laravel Telescope, Sentry

Architecture & DevOps: SOLID Principles, Design Patterns, Service Layers, Git, Docker, Docker Compose, GitHub Actions CI/CD

Integrations: Stripe, Paymob, Apple & Google In-App Purchases, Apple & Google Sign-In, AWS S3, Google Meet, Resend
