SUMMARY

Backend developer with two years of experience building and scaling production APIs and internal business platforms in Laravel and PHP. Currently at Gourmet Egypt developing the retail operations systems behind stores, warehouses, and delivery, alongside a part-time role building the backend of Lothgha's mobile platform. Focused on reliable, maintainable systems owned end-to-end from design through production.

PROFESSIONAL EXPERIENCE

Gourmet Egypt

Backend Developer

05/2025 – Present

Zamalek, Egypt

- Develop and maintain the company's internal operations platform used daily by store, warehouse, and delivery teams.
- Built the centralized product and pricing service that acts as the single source of truth across point-of-sale, e-commerce, and loyalty channels.
- Delivered procurement, inventory, task-compliance, and live order-preparation systems, replacing manual processes with automated workflows.
- Improved responsiveness under load by moving reporting, notifications, and third-party synchronization to background processing.

Lothgha

Backend Developer (Remote, Part-time)

02/2025 – Present

Jeddah, Saudi Arabia

- Develop and maintain the backend powering a production mobile platform, spanning REST APIs, an admin panel, and scheduled background processing.
- Built subscription and payment flows, including card payments and Apple/Google in-app purchases with server-side verification.
- Delivered real-time features including chat, live video sessions, and push notifications.
- Established the automated testing suite and CI/CD pipeline, enabling safe staged releases to staging and production.

ITSP Group

Backend Developer

10/2024 – 02/2025

Giza, Egypt

- Built and documented REST API endpoints backed by normalized relational schemas.
- Structured shared business logic into service layers to keep features isolated and easy to extend.
- Refactored legacy code toward a clean layered architecture and wrote integration tests covering API contracts ahead of each staging release.

PROJECTS

FreshCart — Multi-Vendor E-Commerce API

[github](#)

- Multi-vendor marketplace REST API with customer, vendor, and admin roles, token-based authentication via Laravel Sanctum, and access control through Policies.
- Swappable payment gateways using the Strategy pattern, and a Laravel Pipeline for staged checkout pricing (discount calculation, coupon redemption).
- Order placement and coupon redemption wrapped in database transactions; refunds and notifications offloaded to queued jobs. Typo-tolerant product search with Laravel Scout and Meilisearch; checkout, coupon, and payment flows covered by a PHPUnit suite.

Filament Construction Management System

[github](#)

- Internal admin panel in Filament v4 managing clients, subcontractors, logistics suppliers, expenses, and billing, with role-based access control via Spatie Permission.
- On-demand Excel and PDF exports for financial and operational reports across four system modules.

TECHNICAL SKILLS

Languages & Frameworks: PHP 8.x, Laravel 10/11/12, Filament v3/v4, Livewire

APIs & Real-Time: REST API Design, Laravel Sanctum, JWT, Laravel Reverb, WebSockets, Firebase Cloud Messaging

Databases, Search & Queues: MySQL (Schema Design, Indexing, Query Optimization, Transactions), Redis, Laravel Queues, Laravel Scout, Meilisearch

Testing & Quality: Pest, PHPUnit, Xdebug, Laravel Telescope, Sentry

Architecture & DevOps: SOLID Principles, Design Patterns, Service Layers, Git, Docker, Docker Compose, GitHub Actions CI/CD, Kubernetes (Fundamentals)

Integrations: Stripe, Paymob, Apple & Google In-App Purchases, Apple & Google Sign-In, AWS S3, Resend

EDUCATION & LANGUAGES

Mansoura University — BSc in Information Technology, Egypt

Graduated 2024

Languages: Arabic (Native) | English (Professional Working Proficiency)
